

BS200/S backplanes

The backplanes of the series BS200/S for protection class 1 interconnect the M200 control system hardware modules, such as power supply unit, processor modules and input/output modules, mechanically and electrically. They are the backbone of the controller.

Features

- 3 to 16 module slots
- Seamless connectable/extendable
- Stable mechanics / compact design
- Vibration proof fixing of modules
- Can be snapped on EN 60715 DIN rail
- For protection class 1
- Grounding tab for protective conductor connection, necessary for use of voltages other than SELV
